Chem 452 - Lecture 1 Introduction to Biochemistry Part 2

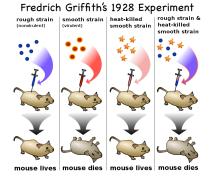

Question of the Day: Watson and Crick made the following observation in their landmark article, which was published in 1953 in the journal Nature, "It has not escaped our notice that the specific pairing we have postulated immediately suggests a possible copying mechanism for the genetic material." What are they talking about?

DNA function

+ In the 1940's DNA was discovered to comprise the genetic material of a cell.

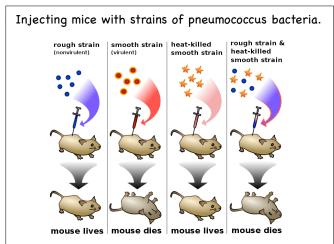

Ostwald Avery, Colin MacLeod and Maclyn McCarty identified the "transforming principle" in Griffith's experiments was DNA

(Wikipedia entry)

Chem 452, Lecture 1 - Introduction to Biochemistry

DNA function

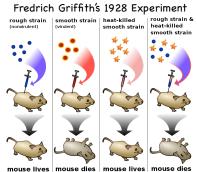

DNA function

+ In the 1940's DNA was discovered to comprise the genetic material of a

cell.

Ostwald Avery, Colin MacLeod and Maclyn McCarty identified the "transforming principle" in Griffith's experiments was DNA

(Wikipedia entry)

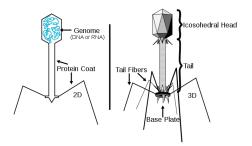

Chem 452, Lecture 1 - Introduction to Biochemistry 2

DNA function

+ DNA's genetic role was confirmed in 1952 by Hershey and Chase.

The experiments of Alfred Hershey and Martha Chase demonstrated that DNA was the infectious component of bacteriophages

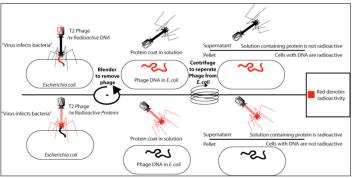

(Wikepedia entry)

Chem 452, Lecture 1 - Introduction to Biochemistry

DNA function

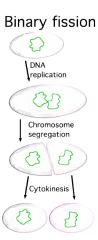

+ DNA's genetic role was confirmed in 1952 by Hershey and Chase.

Chem 452, Lecture 1 - Introduction to Biochemistry 4

DNA function

 One consequence of being the genetic material is that DNA has to be able to replicate itself in order to be passed down from generation to generation

Chem 452, Lecture 1 - Introduction to Biochemistry

DNA structure

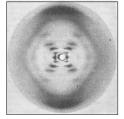

+ Molecular components

Chem 452, Lecture 1 - Introduction to Biochemistry

DNA's structural evidence

- X-ray fiber data (Maurice Wilkins and Rosalind Franklin)
- + Evidence that DNA is helical.
- + 3.4 Å nucleotide repeat
 - This repeat seems to be limited to central region; "...suggests the bases arranged like a pile of pennies in the central regions of the helical system"

Wilkins et al., "Molecular Structure of Deoxypentose Nucleic Acids" Nature 1953, 171, 738-970.

- + 34 Å axial repeat
- See also a 20 Å spacing at right angles to the 34 Å repeat.

DNA's structural evidence

+ Chargaff's Rules (Erwin Chargaff)

Source	Adenine to Guanine	Thymine to Cytosine	Adenine to Thymine	Guanine to Cytosine	Purines to Pyrimidines
Ox	1.29	1.43	1.04	1.00	1.1
Human	1.56	1.75	1.00	1.00	1.0
Hen	1.45	1.29	1.06	0.91	0.99
Salmon	1.43	1.43	1.02	1.02	1.02
Wheat	1.22	1.18	1.00	0.97	0.99
Yeast	1.67	1.92	1.03	1.20	1.0
Hemophilus influenzae	1.74	1.54	1.07	0.91	1.0
E-coli K2	1.05	0.95	1.09	0.99	1.0

Bacillus schatz	0.7	0.6	1.12	0.89	1.0

Chem 452, Lecture 1 - Introduction to Biochemistry 8

DNA's structural evidence

Using other people's experimental results, James
 Watson and Francis
 Crick proposed the now accepted model for the
 3-dimensional structure of DNA

Francis Crick Jame

Chem 452, Lecture 1 – Introduction to Biochemistry 9

DNA proposed structures

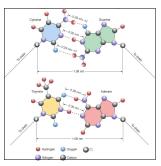

- While Watson and Crick were working on their model for DNA, Pauling and Corey's published an alternative model
- They proposed a triple helix with the ribose phosphate backbone on the inside and the nucleotide bases extending outward from the core.

Pauling, L. & Corey, R. "A Proposed Structure for the Nucleic Acids", Proceedings of the National Academies of Science 1953, 39, 84-97.

DNA proposed structures

+ Watson and Crick proposed specific base pairing to account for both Chargaff's Rules and the 20 Å spacing that Wilkin's and Franklin observed.

Chem 452, Lecture 1 - Introduction to Biochemistry 11

DNA proposed structures

+ Watson & Crick proposed a double-helix

Watson, J. and Crick, F. "A Structure for Deoxribonucleic Acid" Nature 1953, 171, 737-738

Chem 452, Lecture 1 - Introduction to Biochemistry 12

DNA proposed structures

- Watson & Crick proposed a double-helix
 - X-ray structure is a salt and not a free acid. (Negatively charged)
 - + Not clear what forces would hold Pauling and Corey's model together.
 - + Bases are paired
 - + Adenine (a purine) to Thymine (a pyrimidine)
 - + Guanine (a purine) to Cytosine (a pyrimidine)

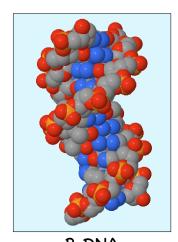

DNA proposed structures

- + Watson & Crick's DNA structure also made biological sense:
 - + "However, if only specific pairs of bases can be formed, it follows that if the sequence of bases on one chain is given, then the sequence on the other chain is automatically determined?"
 - "It has not escaped our notice that the specific pairing we have postulated immediately suggests a possible copying mechanism for the genetic material."

Chem 452, Lecture 1 - Introduction to Biochemistry 14

DNA structure

 The rules of chemistry help us to understand the 3-dimensional structures that are formed by biological macromolecules

Chem 452, Lecture 1 - Introduction to Biochemistry 15

DNA structure

 The duplex (double-helical) structure of DNA forms spontaneously in aqueous solutions.

DNA structure

What interactions (bonds) are involved in holding macromolecules together?

Chem 452, Lecture 1 - Introduction to Biochemistry 17

DNA structure

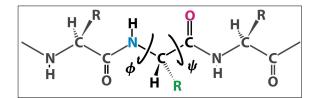

- + Interatomic interactions (bonding)
- + Thermodynamics
 - + What can it tell about duplex formation.
- + Acid/Base chemistry
 - + We live in an aqueous world

Chem 452, Lecture 1 - Introduction to Biochemistry $\;\;$ 18

Intermolecular Interactions (Bonds)

- + Covalent bonds
 - + Determine the local shape.

- + Covalent bonds
 - + Rotation about single bonds allow for multiple conformations.

Chem 452, Lecture 1 - Introduction to Biochemistry 20

Intermolecular Interactions (Bonds)

- + Non-covalent interactions (bonds)
 - + Charge/Charge

$$egin{pmatrix} {f q_1} & & & & {f r} \ & & & & {f r} \approx rac{q_1q_2}{Dr^2} & {f Coulomb's \ Law} \ & & & & E = rac{kq_1q_2}{Dr} \ \end{pmatrix}$$

Chem 452, Lecture 1 - Introduction to Biochemistry $\,$ 21

Intermolecular Interactions (Bonds)

- + Non-covalent interactions (bonds)
 - + Charge/Charge

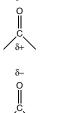

$$q_1$$
 q_2

$$F \approx \frac{q_1 q_2}{Dr^2}$$
 Coulomb's Law

$$E = \frac{kq_1q_2}{Dr}$$

+ Hydrogen Bonds?

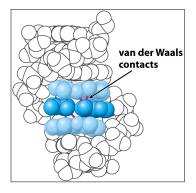

Chem 452, Lecture 1 - Introduction to Biochemistry

DNA structure

+ vander Waals Interactions?

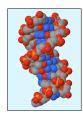

Chem 452, Lecture 1 - Introduction to Biochemistry

Questions

- + What interactions drive the formation of the DNA double helix?
- + What interactions stabilize that structure once it is formed?

- + Systems and Surroundings
 - + System + Surroundings = Universe
- + First Law
 - + $\Delta E_{total} = 0$
 - + The total energy of the Universe is fixed!!
 - + $\Delta E_{\text{system}} = q + w$
 - + q = heat absorbed by the system
 - + w = work done on the system

Chem 452, Lecture 1 - Introduction to Biochemistry 39

Thermodynamics

- + Systems and Surroundings
 - + System + Surroundings = Universe
- + Second Law
 - + Entropy (S) is a measure of disorder.
 - + $\Delta S_{\text{system}} = q_{\text{system}}/T$
 - + For any spontaneous process, the entropy of the Universe increases!!
 - + $\Delta S_{universe} > 0$
 - + $\Delta S_{universe} = \Delta S_{system} + \Delta S_{surroundings}$

Chem 452, Lecture 1 - Introduction to Biochemistry 40

Thermodynamics

- + Δ Suniverse
 - + The Change in Entropy for the Universe $(\Delta S_{universe})$ can be used as a tool to predict whether reactions or processes are spontaneous or not.

 $\Delta S_{universe} > 0$, the reaction or process is spontaneous as written

 $\Delta S_{universe} < 0$, the reaction or process is not spontaneous as written, it is, however, spontaneous in the reverse direction.

 $\Delta S_{universe} = 0$, the reaction or process is at equilibrium.

- + $\Delta S_{universe}$
 - + The Change in Entropy for the Universe $(\Delta \, S_{\text{universe}})$ can be used as a tool to predict whether reactions or processes are spontaneous or not.

 $\Delta S_{iniverse} > 0$, the reaction or process is spontaneous as written $\Delta S_{iniverse} < 0$, the reaction or process is not spontaneous as written, it is, however, spontaneous in the reverse direction.

 $\Delta S_{universe} = 0$, the reaction or process is at equilibrium.

With Δ S, you must look at the whole universe to determine if a reaction is sponfame 65%. Lecture 1 - Introduction to Biochemistry 41

Thermodynamics

+ Gibb's Free Energy (ΔG_{system})

$$\Delta H_{\text{system}} = q_{\text{P}} \text{ (at constant } P)$$

$$\Delta S_{\text{surroundings}} = \frac{q_{\text{surrounding}}}{T} = -\frac{q_{\text{system}}}{T} = \frac{-\Delta H_{\text{system}}}{T} \quad (\text{at constant } P \& T)$$

$$\Delta S_{\text{universe}} = \Delta S_{\text{system}} + \Delta S_{\text{surroundings}}$$

$$\Delta S_{\text{universe}} = \Delta S_{\text{system}} - \frac{\Delta H_{\text{system}}}{T}$$

$$-T\Delta S_{\text{universe}} = -T\Delta S_{\text{system}} + \Delta H_{\text{system}}$$

$$\Delta G_{\text{system}} = \Delta H_{\text{system}} - T \Delta S_{\text{system}}$$
 (at constant $P \& T$)

Chem 452, Lecture 1 - Introduction to Biochemistry 42

Thermodynamics

+ Gibb's Free Energy (Δ G)

 $\Delta G_{\text{system}} < 0$, the reaction or process is spontaneous as written

 $\Delta G_{\text{system}} > 0$, the reaction or process is not spontaneous as written, it is, however, spontaneous in the reverse direction.

 $\Delta G_{\text{system}} = 0$, the reaction or process is at equilibrium.

+ Gibb's Free Energy (Δ G)

 $\Delta G_{\text{system}} < 0$, the reaction or process is spontaneous as written $\Delta G_{\text{system}} > 0$, the reaction or process is not spontaneous as written, it is, however, spontaneous in the reverse direction.

 $\Delta G_{\text{system}} = 0$, the reaction or process is at equilibrium.

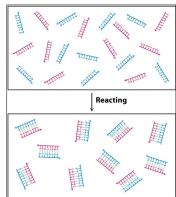

When using $\Delta \, {\rm G},$ you only need to look at the system to determine if a reaction is spontaneous.

Problem

Given the following values for the changes in enthalpy (ΔH) and entropy (ΔS), which of the following processes can occur at 298 K without violating the Second Law of Thermodynamics?

- A) $\Delta H = -84 \text{ kJ/mol}$ and $\Delta S = +125 \text{ J/mol}$
- B) $\Delta H = -84 \text{ kJ/mol}$ and $\Delta S = -125 \text{ J/mol}$
- C) $\Delta H = +84 \text{ kJ/mol}$ and $\Delta S = +125 \text{ J/mol}$
- D) $\Delta H = +84 \text{ kJ/mol}$ and $\Delta S = -125 \text{ J/mol}$

$$\Delta G_{system} = \Delta H_{system} - T \Delta S_{system}$$

Looking ahead to Monday, 10. Sept.
